Summary

Staff Product Designer with 8+ years of experience designing for complex systems and scientific domains. Expert at transforming large, technical data sets into intuitive, high-impact products, including AI-powered tools where understanding user intent and model behavior is central to the design. Experienced in building new products and navigating ambiguity, using rapid ideation and concept testing to achieve product-market fit. Skilled at delivering high-quality designs at speed through iterative validation and shipping.

Education

BASc., Management Engineering
University of Waterloo
Sep 2012 – Apr 2017

Skills

AI Product Design

Designing for AI-powered tools
Prompt pattern analysis
Human-AI interaction design
Evaluating model behaviour and output

User Research and Strategy

User testing
User journey mapping
Translating findings into actionable designs
User intent analysis

Prototyping and Validation

Rapid prototyping
Concept testing
Iterative validation

Collaboration and Facilitation

Design review and workshop facilitation
Multi-party systems design
Cross-functional alignment

Complex Systems

Designing for complex data sets,
scientific and technical domains

Tools

AI Tools

v0 Bolt Claude

Design and Prototyping

Figma Whimsical Miro

Frontend and Prototype Code

HTML CSS React

User Research and Analysis

Dovetail Maze Fullstory
Looker Rally Heap
Hex Amplitude

Product Management & Collaboration

Jira Aha
Monday Google Slides/Sheets/Docs

Experience

BioRender | Nov 2025 – Present
Toronto, Canada – Remote

Senior Product Designer

- Leading design of an AI image generation tool that generates editable, component-based visuals, reaching 3,000+ generations from 300+ users in the first week of launch
- Designed and conducted user research to validate workflow and editing assumptions, synthesizing findings into actionable design outcomes
- Ran data analysis to identify prompting patterns and user intent, categorizing figure types and diagnosing drivers of re-prompting behaviour
- Contributed to product strategy and positioning, defining how the tool integrates with the existing AI product ecosystem

BenchSci | Aug 2020 – Jul 2025
Toronto, Canada – Remote

Lead Product Designer | Sep 2022 – Jul 2025

- Led design of a new AI-powered assessment tool from concept to MVP, enabling scientists to evaluate drug targets more efficiently
- Delivered rapid iterations in collaboration with research and engineering, reducing prototype validation cycles by 50%
- Facilitated weekly "design jam" sessions to create a safe space for cross-functional team members to review designs, identify challenges early, and build team alignment; regularly curated and shared design best practices to boost team design fluency
- Facilitated weekly visual syncs with designers and researchers to improve cross-functional visibility and surface blockers or dependencies early
- Led weekly design reviews with design team to ensure team alignment, support individual needs, and maintain momentum across initiatives

Senior Product Designer | Jun 2021 – Aug 2022

- Designed and launched a new product from concept to MVP in just 5 months in a fast-paced, cross-functional environment
- Partnered closely with UX research to conduct rapid concept testing, refining the experience to align with user needs and move toward product-market fit

Product Designer | Aug 2020 – May 2021

- Improved successful search outcomes by redesigning search and filtering experiences, owned discovery through user testing to high-fidelity design
- Defined core design system principles, helping standardize UI patterns and improve cross-product consistency

Nulogy | Sep 2017 – Aug 2020
Toronto, Canada – In Office

Product Designer

- Drove early adoption of the design system, improving UI consistency and development speed across the ecosystem platform.
- Led end-to-end design as the sole designer on two product teams, overseeing discovery to delivery.
- Coded and launched Nulogy's developer hiring site (engineering.nulogy.com), validating through user testing and stakeholder interviews.

Ultimate Software (Now UKG) | Sep 2016 – Dec 2016
Toronto, Canada – In Office

UX Designer

- Redesigned configuration flows for punch clock software, reducing typing errors and input mistakes
- Simplified complex payroll administration workflows, improving clarity and reducing user friction
